

NEW FOR 2024

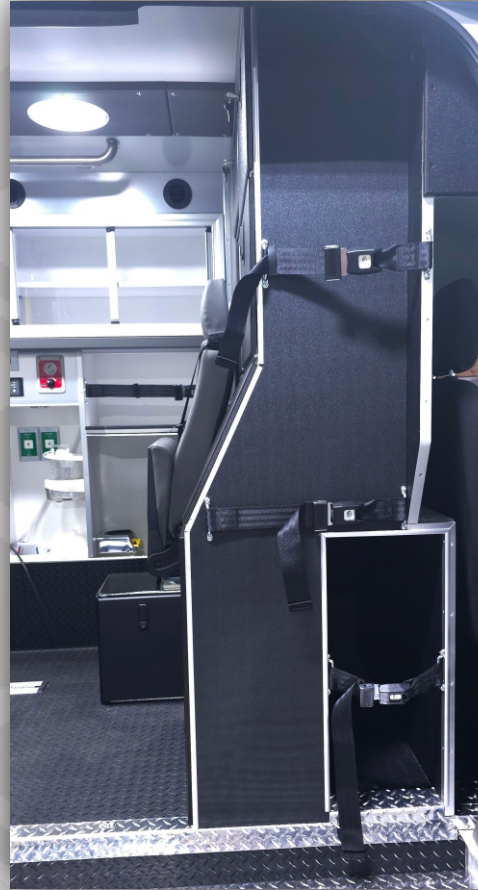

New Bulkhead Design...

The Transit Bulkhead was redesigned to accommodate the storage for a Stair Chair without using up the valuable bulkhead space that's currently available.

The storage is now tucked up behind the cab seats while not compromising the maneuverability of the driver, and/or passenger. Leg room and tilt space was not changed on these seats.

The Stair Chair can be easily removed from the side-door by sliding the backboard over and pulling out the chair. Otherwise, it stays tucked in and out of the way when not in use.

This 10"W x 24"H x 38"D accommodates most popular chair sizes including track units.

Shown here with the Bulkhead Doors option, There is still ample storage room. The center cabinet below the window extends to the area behind the attendant seat to allow for even more storage space.

The lower cabinet can be used as a writing surface while in transit.
